1. Contractor log on screen (unchanged)

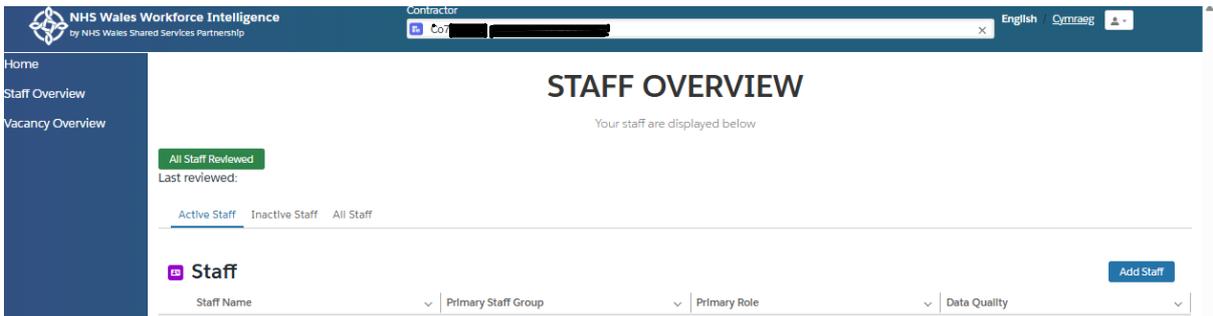

2. Staff Overview Screen

With effect from the 16th of February 2026 a new feature has been added to PCWIS. To support Ophthalmic Practices, meeting their requirement to log on and check their Practices data quality remains up to date, a new "**All Staff Reviewed**" declaration has been introduced. This appears in the upper left portion of the overview screen highlighted in green.

From this moment forward Ophthalmic Practices **are required** to click on "All Staff Reviewed" after logging on, **whether they have made changes** or **if there are no changes.**

3. Confirmation if the action was successful will be visible afterwards, both as a pop-up confirming success and recorded with a date and time stamp below the "All Staff Reviewed" box (which will change from green to white)
